"Freshness Protector Pails"

EATON® BAIT BLOCKS® are now available in new heavy-duty plastic pails that protect the bait from moisture, damage during transport and any potential cross contamination.

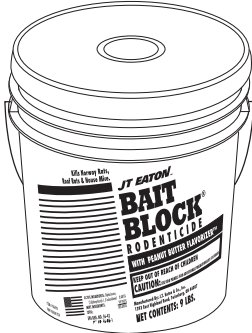

A handy "easy-carry" handle makes it easier than ever to carry these "Freshness-Protector" pails to and from the worksite and from one baiting location to another. The resealable lids assure that bait efficacy is maintained no matter how many times a pail is opened to remove bait.

Appropriate for both indoor and outdoor use, EATON BAIT BLOCKS are still formulated with a blend of natural foods and grains that are preferred by both rats and mice. Therefore, there is no problem with bait shyness: rodents will return to the bait again and again.

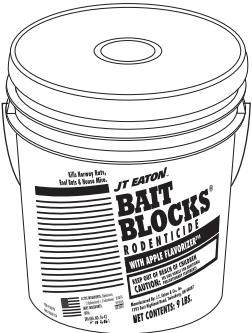

Also important to pest control operators: EATON BAIT BLOCKS are accepted for use in federally inspected food plants, and meet government labeling requirements.

For best results with EATON BAIT BLOCKS

FOLLOW LABEL DIRECTIONS.

9 lb. Pail
#709-PN 2 oz. BAIT BLOCK®
