Professional Pest Control Operators asked for a multiple catch mouse trap that would fit in tight areas and could be placed out of the view of customers. This is how the Little Pete® was created. PCOs had a need and JT EATON™ delivered.

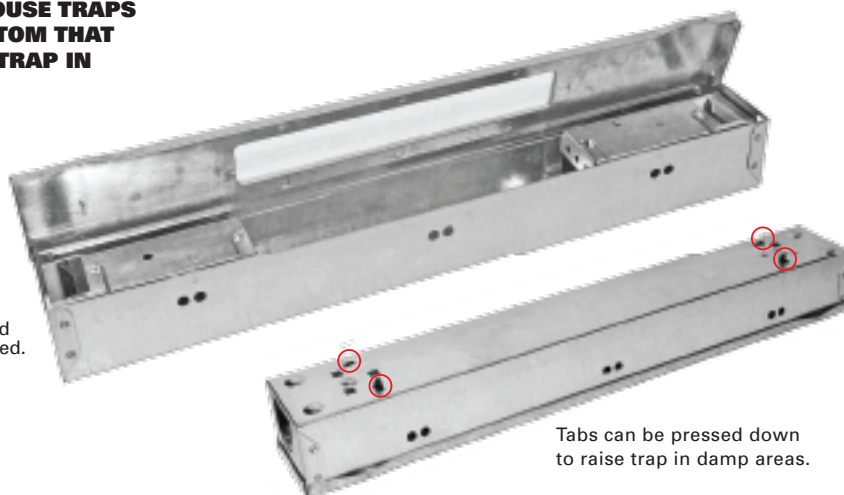

Little Pete® mouse traps use the same quality Galvanized Steel construction as the Repeater™ but are 55% narrower. This allows them to be placed in areas never before possible.

It is also easy to replace the ramps with the guides on the trap base. The guides are positioned in a way that the ramps can only be placed in the proper direction. Fast, easy and virtually foolproof, that's the SPEEDY CLEAN® way.
