ACTIVE INGREDIENT:
Diphacinone
CAS(82-66-6) 0.005%
OTHER INGREDIENTS: 99.995%
TOTAL 100.000%

EPA REG. NO. 56-57
EPA EST. NO. 61282-WI-1

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
NOTE: THIS LABEL MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.

USE RESTRICTIONS: This product is only for use in manual subterranean applications to control valley pocket gophers (*Thomomys bottae*), northern pocket gophers (*T. talpoides*), Mazama pocket gophers (*T. mazama*), Townsend's pocket gophers (*T. townsendi*), giant pocket gophers (*T. bulbivorus*), Sierra pocket gophers (*T. monticola*) and plains pocket gophers (*Geomys bursarius*).
This product is to be used in RANGELAND, CROPLAND, (grain fields, forage crops, hay and alfalfa crops and vegetable crops), FOREST and NONCROP AREAS including parks, nurseries and around homes. Do not apply this product above the ground surface. Do not apply this product by use of a mechanical burrow builder machine or any other type of mechanical application equipment, including mechanized probes. **Do not broadcast bait.**
BAITING: Place baits in main runways. To locate main runways, probe 12 inches to 18 inches from the surface mound on the side which is flattened or depressed, using a burrow probe or a smooth metal rod. When resistance on probe suddenly decreases, probe is in the main runway. Open the runway with the probe, a spade or a shovel. Place one ANSWER® BAIT BLOCK® into each opening of the runway and cover the opening securely to exclude light. Do not permit the loose soil to cover bait.
Place baits at two or three locations in each main burrow (runway) system. A pocket gopher will normally travel to all portions of its burrow system within a few days. As some gophers may die above ground, check the area periodically for 10 to 15 days after treatment. Bury or incinerate (if permitted locally) any dead animals found. If pocket gopher activity persists 2 weeks after treatment, bait the active burrow a second time.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith. The efficacy of the product may be reduced under high moisture conditions.
